BECAFIRE

A FAMILY RUN
BELGIAN
MANUFACTURERS
FOR
GENERATIONS

A family requirement

The family business began 40 years ago, thanks to the vision of Bernard Cailliau, a true pioneer for his time. His idea of creating fireplaces from A to Z – from designing the appliance to installation and custom cladding – revolutionized the sector in Belgium and later in Northern France.

A few years later, with the acquisition of a foundry, the cast-iron Becafire appliances were born.

Over time, technical improvements and requirements have been met – and often even anticipated.

Today

Today, we are able to offer you a complete range of high-performance appliances whose reliability is well established.

The continuity of our company is ensured by Mr. Cailliau's sons, who have proudly joined the adventure and are carrying the torch forward.

Exporting our products has become a key priority, and every effort is made to ensure our distributors receive full support – from delivery to installation.

We therefore guarantee you a product of the highest quality, combining performance with design.

THE FOUNDRY

Mastering Fire and the materials

Becafire equips all its appliances with a cast-iron interior, ensuring superior heat distribution throughout the living space. This also guarantees long-lasting durability of the combustion chamber over the years.

INSERTS

INSERT FRONT

The latest addition to the range of inserts is a highly efficient system with extremely low energy consumption, based on a specific operating principle.

The key point to note is that connectable wood inserts do not draw air from the room in which they are installed. Instead, they take air from the outside or from the crawl space through a connection duct located at the bottom of the insert.

BASES

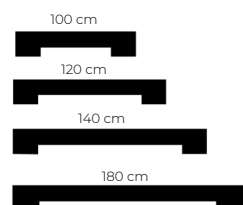

PEDESTAL BUCHE

Material metal bench
Depth : 47 cm
Height : 38 cm

PEDESTAL STEEL-C

Material metal bench
Depth : 47 cm
Height : 38 cm

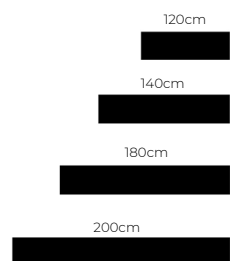

PEDESTAL WOOD-MAS

Material
Top leaf in granite Zimbabwe / Base in solid oak

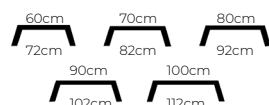

Available in two colours
Light oak / Dark oak

Available in two heights
Model two levels of 30 cm
Model three levels of 45 cm
With a depth of 47 cm

OBLIQUE PEDESTAL

Material metal bench
Depth : 47 cm
Height : 38 cm

PEDESTAL CAILLA

Material metal bench
Depth : 50 cm
Height : 38 cm

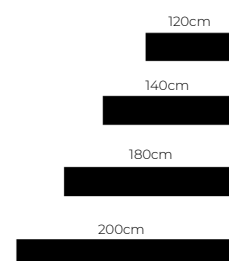

PEDESTAL WOOD-UP

Material
Top leaf and legs in black steel / Base in solid oak

Available in two colours
Light oak / Dark oak

Depth : 60 cm
Height : 40 cm

PEDESTAL STARK

Material
- Right side in metallic steel
- 1,5m unit with two drawers
Available in two colours
Light oak / Dark oak

Depth : 50 cm
Height : 38 cm

PEDESTAL ODE

Material metal bench

Depth : 45 cm
Height : 45 cm

PEDESTAL SCALA

Material
- For our collection of front materials, see main catalog
- Top leaf available in different finishes, see our Neolith range

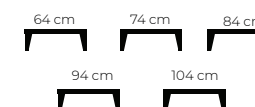

Depth : 47 cm
Height : 40 cm

PEDSATL RONDO

Material metal bench

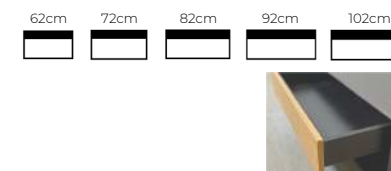

Depth : 50 cm
Height : 15 cm

PEDESTAL LIAC

Material
- Sides in black melamine with front drawer in light oak
- Leaf in satin-black Neolith

Depth : 45 cm
Height : 38 cm

PEDESTAL ESTRAD

Material metal bench

Depth : 47 cm
Height : 15 cm

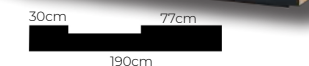

PEDESTAL HARKANY

Material
- Front and recess in metallic steel
- Top leaf and wooden sides in melamine

Available in two colours
Light oak / Dark oak

Depth : 50 cm
Height : 38 cm

WARNING: This model is only available for the following CUB'R:
60/70/80 CUB'R Front
80/60 CUB'R Double-Sided
For all other dimensions, please submit a request to BECAFIRE.

EASY TO USE

The combustion chamber in BECAFIRE products is so hermetic that the fire reacts to the tiniest movement of the air intake control.

The control components cool automatically, thanks to their special design.

The forms and movements of the control components are extremely natural and intuitive.

OUTSIDE AIR

Our very latest addition to the insert family features a special system, making it extremely powerful and energy-efficient.

What you need to remember is that connectable wood stoves do not suck air from the room. Instead, they use air from outside or take it from the empty space below the cassette via a connecting pipe.
